

BEC MX-1000

Advanced In-Vehicle Router

Multi-Carrier M2M LTE Router

Enabled with advanced software, BEC MX-1000 is a high performance all-in-one fixed wireless communication platform. With its high availability, reliable and secure connectivity, BEC MX-1000 is designed to support a wide range of applications and vertical M2M market segments.

Designed for Mission Critical Applications

- High Performance GPS Engine
- Failover/Fallback and Load Balancing
- Dual Radio and Dual SIM Functionality
- Wi-Fi Carrier Hotspot with Captive Portal
- Supports Public Safety and Commercial LTE Bands
- Enterprise Class Router with Secured VPN Support
- Multiple Gigabit Ethernet & USB Interfaces
- Extreme Operating Temperature with BEC ColdStart^o

True-Seamless Failover

Multi Carrier Multi Radio for Concurrent Connectivity
Automatic Failover/Fallback

Intelligent Ignition Sensing

Low Voltage Power Protection with Automatic ON and Time-delay OFF

Remote Device Management

Support by BEC's Cloud-Based Device Management Platform
