**Device Information**

Model ID <b>BEC 6300VNL</b>	Online 	LTE 	BAND <b>B4</b>
Device Name <b>James' Home</b>			
Uptime <b>1 Days 9 Hr 59 Min</b>	Data Usage (MB) <b>Download : 1.72</b> <b>Upload : 1.55</b> <a href="#">Data Usage</a>	Limit <input type="text" value="1%"/>	IMSI 

BEC LTE Routers are tightly integrated with BECentral®, BEC's Cloud-Based Remote Management Platform. BECentral® enables real-time device monitoring, provisioning, troubleshooting and maintenance from a single centralized location. The platform will simplify device access, lower support expenses, accelerate Deployments/Service Delivery and maximizes the operational efficiency and profitability.

Device Provisioning and Control

Firmware Over-the-Air (FOTA)

Real-time Signal Quality and Performance

Traffic Analysis & Bandwidth Monitoring

Remote Diagnostics and Troubleshooting

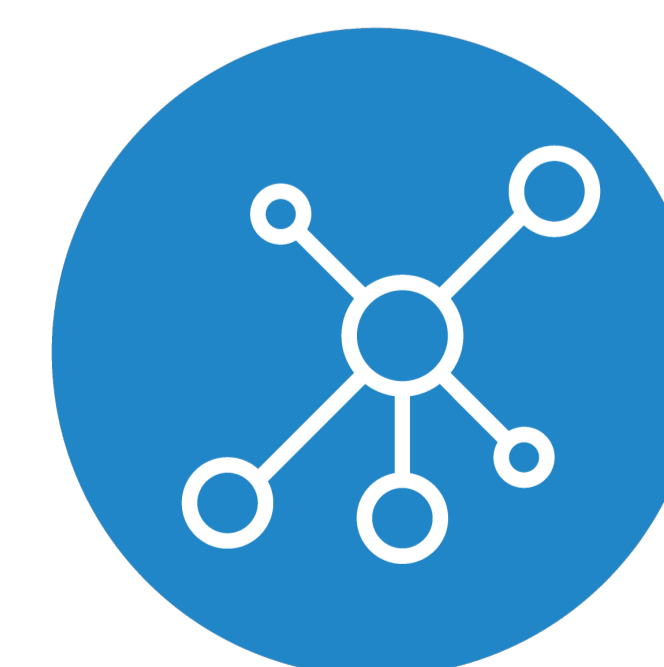

Application/Service Enablement

Alerts Policy & Notification

Ticket System Integration

Well Defined API
