MANAGEMENT**

# WHY CHOOSE BECentral

## Highly Available and Secure

Fully redundant cloud-based SAN for 99.995% uptime and two factor authentication with granular role-based access rights

## Cost Savings

Eliminate the need for on-premise solutions, costly infrastructure, servers or client software keeping capital and operational expenses to a minimum.

## Centralized Multi-site Management

Bring all clients and devices under one management platform, simplifying device access, streamline and speed up deployment, lower support expenses and maximize the operational efficiency and profitability

# KEY FEATURES

## BECentral Dashboard

Quickly view a summary of carrier networks, devices and network type from an easy-to-use dashboard

## 01 Proactive Alerts and Notifications

BECentral provides a sophisticated rules engine that can easily be configured to generate custom alerts upon a variety of data conditions. Notification can be sent via email, SMS txt message, voice call or as pop-up alerts when users log into the Cloud Portal.

Alert Notification

## 03 Integration and Scalability

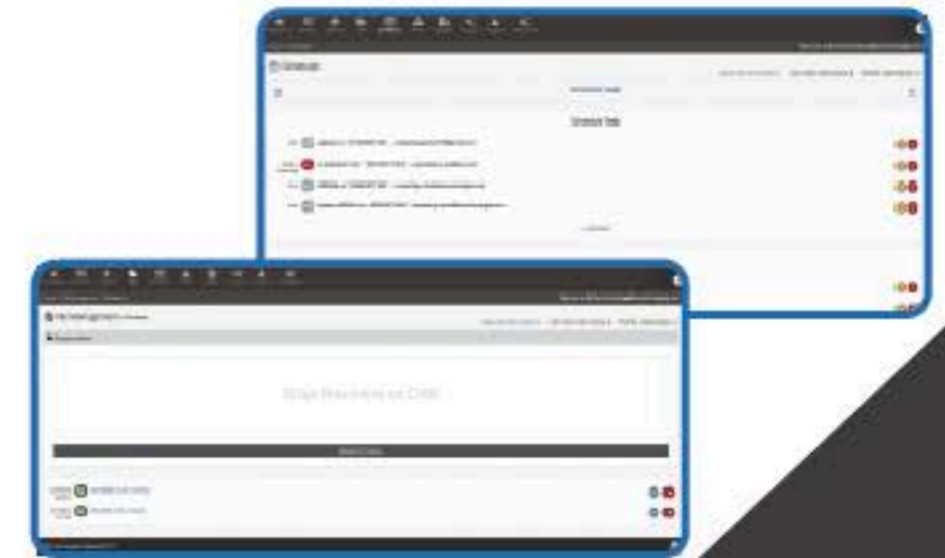

Comprehensive APIs to facilitate application development or quickly integrate device data into other platforms, i.e. CRM, ERP or Billing

## 04 Multi-Tenant Management

Create a secure and separated client hierarchy enabling recurring revenues opportunities such as client self-service options, reporting or localized messaging

## 05 Firmware Management

BECentral provides complete firmware management repository with scheduling. Display current firmware version across all devices and schedule automated updates for individual or for groups of devices.

Firmware Update & Task Scheduler

## SUPPORTED PRODUCTS

6300VNL Enterprise LTE Router

MX-200e WWAN Failover Manager

MX-200 Series Industrial LTE Router

MX-1000 Enterprise Multi-Carrier Router

MX-200A ODU LTE/LTE-A Outdoor Router

RidgeWave series LTE Outdoor Router

## 02 Connectivity Management

Understand and Manage cellular data usage, set allowances and control cost

Data Plan Control

## APPLICATIONS

Fixed Broadband

Enterprise

Business Continuity

M2M/IoT

Industrial

Public Safety

Retail PoS/ATM

Kiosk/Signage
