

Centralized Multi-site Management

Bring all clients and devices under one management platform, simplifying device access, streamline and speed up deployment, lower support expenses and maximize the operational efficiency and profitability

Proactive Alerts and Notifications

BECentral provides a sophisticated rules engine that can easily be configured to generate custom alerts upon a variety of data conditions. Notification can be sent via email, SMS txt message, voice call or as pop-up alerts when users log into the Cloud Portal.

BECentral Service Enablement Platform

Enable new business models
Improve operational efficiencies and optimize service delivery

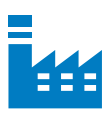

Applications

Fixed Broadband

Enterprise

Industrial

M2M/IoT

Business Continuity

Retail PoS /ATM

Public Safety

Kiosk/ Digital Signage

Supported Products

6300VNL Enterprise LTE Router

WWAN Failover Mannager

MX-200 Series Industrial LTE Router

MX-1000 Enterprise Multi-Carrier Router

MX-200A ODU LTE/LTE-A Outdoor Router

RidgeWave series LTE Outdoor Router

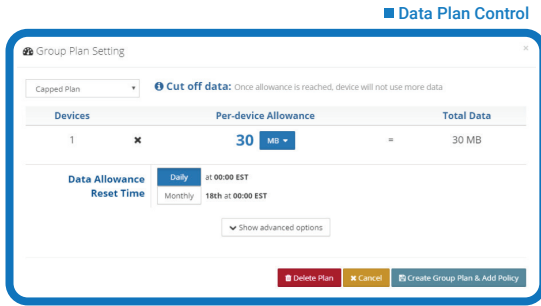

Highly Available and Secure

Fully redundant cloud-based SAN for 99.995% uptime and two factor authentication with granular role-based access rights

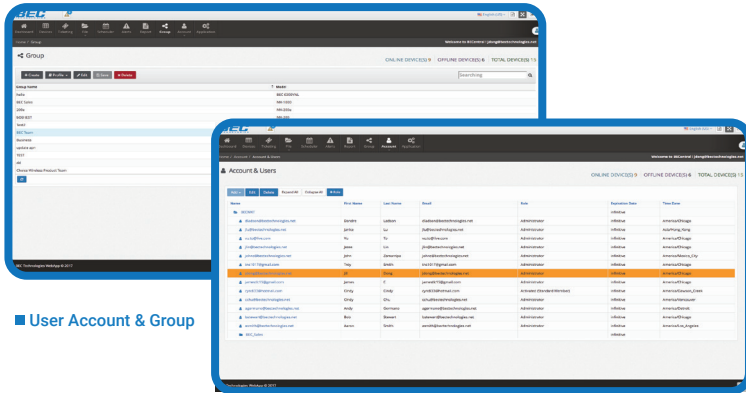

Connectivity Management

Understand and Manage cellular data usage, set allowances and control cost

Multi-Tenant Management

Create a secure and separated client hierarchy enabling recurring revenues opportunities such as client self-service options, reporting or localized messaging

Cost Savings

Eliminate the need for on-premise solutions, costly infrastructure, servers or client software keeping capital and operational expenses to a minimum.

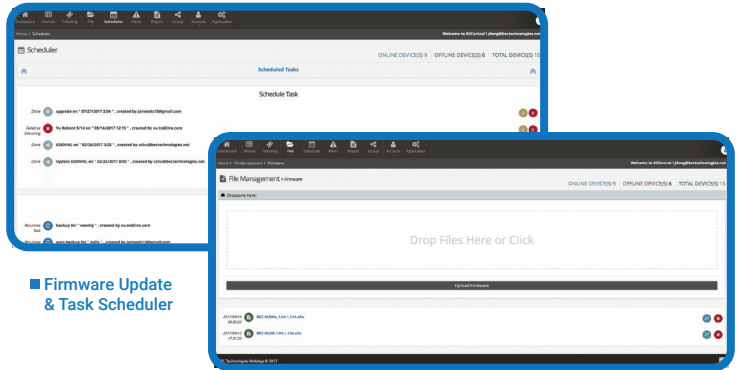

Integration and Scalability

Comprehensive APIs to facilitate application development or quickly integrate device data into other platforms, i.e. CRM, ERP or Billing

Firmware Management

BECentral provides complete firmware management repository with scheduling. Display current firmware version across all devices and schedule automated updates for individual or for groups of devices.
