

# THE PRIVATE EVENT WITH A WI-FI NETWORK AT 10,780 FEET HIGH THE BASE OF ARAPAHOE BASIN SKI AREA

*“A special shout out to BEC Technologies, Inc. for hooking us up with our own personal Wireless Network at 10,780 feet at the base of Arapahoe Basin - a notoriously bad spot for a signal.”—Michael Taliercio, Territory Director, Western US at Lifeboat Distribution*

## The Event

GET THE 411, A Lifeboat Distribution Event

## The End Users

Approximately 50 Event Attendees

## Product

BEC 4700AZ 4G/LTE Outdoor Router

## Application

LTE Wi-Fi Hotspot in a Harsh Outdoor Environment

## Data Connectivity

4G/LTE Wireless Service

## Results

By deploying BEC's outdoor router, Lifeboat Distribution was able to provide fast and reliable Wi-Fi coverage throughout the entire event.

Every year, Lifeboat Distribution organizes many network events to boost an engaged and active relationship between the vendors/manufacturers and their customers. GET THE 411 is one of these network events.

GET THE 411 is hosted at the legendary Arapahoe Basin Ski Area. It's a one-day event with skiing and lunch. As the organizer, Lifeboat seems to have everything ready, except providing internet access during the event. They couldn't figure out how to quickly establish temporary network connectivity in a remote mountain area full of snow. They reached out to their partner BEC Technologies, a leading wireless connectivity devices supplier, for help.

BEC's engineer did a quick geography assessment, recommended using BEC's 4700AZ 4G/LTE Router along with 4G/LTE Wireless data as the solution. BEC's 4700AZ is the industry's first outdoor LTE router with 802.11ac hotspot. The carrier-grade hotspot and high capacity can provide more than enough Wi-Fi coverage for the entire event. Power over Ethernet (PoE) allows for installation without having to connect to AC power. Most importantly, the compact and industrial-rugged IP68 enclosure is designed to work in harsh weather conditions.

As a result, by deploying BEC's outdoor router, Lifeboat Distribution was able to provide fast, reliable and seamless Wi-Fi coverage throughout the entire event.

*“We are so grateful for awesome partners making things happen! Even on top of the Colorado mountains!”—Lifeboat Distribution*
